

# FROM My point of View

## 2013 BSZS Germany

For over 15 years I have attended the Sieger Show (BSZS) in Germany. Here are my thoughts and point of view. A critical opinion, I believe, is definitely permitted and appropriate.

As a breeder, the presentation of the progeny groups has very significant value for me. For this reason, I will begin my report with the progeny groups. The integration of the officiating judges of the BSZS classes in the evaluation of the progeny groups is an excellent change.

**The following progeny groups were of very good anatomical quality:**

1. **\*Remo vom Fichtenschlag, SZ 2208401, SchH3, WT:15.05.2007**  
**HD-Befund (hips): Normal – ED-Befund (elbows): Normal**

*Ray vom Fichtenschlag, SZ 2154538, SchH3	*Dux du Cuatro Flores	Hill vom Farbenspiel
		Lina von Arminius
*Thora vom Fichtenschlag, SZ 2157843, SchH3	*Carolin vom Fichtenschlag	Yasko vom Farbenspiel
		Günnie vom Fichtenschlag
	*Wilcko vom Fichtenschlag	Orbit von Tronje
		Unsa vom Fichtenschlag
	*Lufti vom Hühnegrab	Hill vom Farbenspiel
		Ola vom Akrobat

**Inbreeding:** Hill Farbenspiel (3-3) Eros Luisenstraße (5,5-5)

\*Kelly Arminius (4-)-Karly Arminius(-5)\*

**Sire:** Remo goes via his grandfather Dux du Cuatro Flores (VA2005-2007) to his inbred ancestor Hill vom Farbenspiel whose father is Huppy von Arlett (VA 1999). The line goes via Eros von der Luisenstraße (V3 1993) back to **Cello von der Römerau** (V3 1987).

**Dam:** The mother's line goes via Yasko von der Roten Matter's (V 3 1995) grandson Orbit von Tronje (VA2002/03) to the 1993 breed Sieger **Jeck von Noricum**. Via Jeck's father Odin von der Tannenmeise (VA1987/88), this line goes to the 1986/87 Double sieger **Quando von Arminius**.

Placements of offspring in the top of classes:

GHKL-males: 3 x V-A (Excellent Select), GHKL-females: 3 x V-A (Excellent Select), JHKL-female: Very Good 4.

The group was led by the father. The dogs in the group showed great type and expression consistency to the father, the dogs were predominantly of a very good anatomical structure, with very good type and expression, clear differentiation between the genders, were of standard size and had very good movement. From my point of view, the very good inheritance comes from the male side. Of special mention is the percentage of dogs shown in the working dog class.

**2. \*Omen vom Radhaus, SZ 2267318, SchH3, WT: 27.08.2009**

**HD-Befund (hips): Normal – ED-Befund (elbows): Normal**

*Remo vom Fichtenschlag, SZ 2208401, SchH3	*Ray vom Fichtenschlag	Dux de Cuatro Flores
		Carolin vom Fichtenschlag
	*Thora vom Fichtenschlag	Wilko vom Fichtenschlag
		Lufti vom Hühnegrab
*Oprah von Aurelius SZ 2211180, IPO2	*Vegas du Haut Mansard	Pakros d' Ulmental
		Rangoon du Haut Mansard
	*Ulli von Aurelius	Nero vom Nöbachtal
		Prisca del Lagorai

**Inbreeding:** Jango Fürstenberg (5-5) Ursus Batu (5-5)

**Sire:** Via his father Remo vom Fichtenschlag (Sieger 2011/12) Omen goes to Dux Cuarto Flores (VA 2005-2007) and Hill vom Farbenspiel (VA 2002-2004). Hill is a son of Huppy Arlett (VA 1999) who goes via Eros von der Luisenstraße (V3 1994) back to **Cello von der Römerau** (V3 1987).

**Dam:** Omen is a maternal grandson of Vegas du Haut Mansard (Sieger 2008/09). The line goes via Pakros d'Ulmental (Sieger 2007) and Bax von der Luisenstraße (Sieger 2003) to Odin vom Hirschel (VA 1997/98) and then further via Nero vom Hirschel (VA1993/94) to **Zamb von der Wienerau** (Sieger 1993). Via his father Odin von der Tannenmeise (VA 1987/88), Zamb is in the bloodline of **Quando von Arminius**. (Sieger 1986/87).

TSB Examination result= 4:5

Placements of offspring in the top of classes:

JHKL-females: very good 5 and very good 6, JKL-males: very good 6.

The group was led by the father. The dogs in the group showed great type and expression consistency to the father, the dogs were predominantly of a very good anatomical structure, with very good type and expression, clear differentiation between the genders, were of standard size and had very good movement. In my opinion, the very good inheritance comes from the female side. The future will tell what percentage of the dogs shown will present themselves in the working dog class.

**3. \*Fulz di Zenevredo SZ 2250707, SchH3, WT:21.10.2008**

**HD-Befund (hips): Normal – ED-Befund (elbows): Normal**

*Furbo degli Achei, SZ 2213251, SchH3 IPO2	*Quenn vom Löher Weg	Uran vom Moorbeck
	*Fenia degli Achei	Elsa vom Kuckucksland
*Janos von der Noriswand		Baru vom Haus Yü
	*Jemy di Zenevredo, LOI 05/73177, IPO1	*Gilda die Casa Mary
*Gilda die Casa Mary		Yasko vom Farbenspiel
		Rimona von der Noriswand
		Dingo di Casa Mary
		Zora di Casa Mary

**Inbreeding:** Ursus Batu (4-4) \*Urk Wienerau (5-)-Ultri Wienerau (-5)\*

**Sire:** Fulz, a son of Furbo degli Achei (VA 2008) is, via his grandfather Quenn vom Löher Weg (VA 2005/07), in the bloodline of Ursus von Batu (Sieger 2000). Ursus' father Hobby Gletschertopf (V22 1997) goes via **Jeck Noricum** (Sieger 1993) to Odin Tannenmeise (VA1987/88) and further to **Quando von Arminius** (Sieger 1986/87)

**Dam:** The mother, Jemy di Zenevredo (no Sieger show rating), is a granddaughter of Yasko Farbenspiel (Double Sieger 2001/2002) whose father Ursus Batu (Sieger 2000) goes via Hobby Gletschertopf (V22 1997) to **Jeck von Noricum** (Sieger 1993). The father of Jeck is Odin Tannenmeise (VA1987/88) who goes back to **Quando von Arminius** (Sieger1986/87).

TSB Examination result= 4:4

Placements of offspring in the top of classes:

JHKL-males: very good 2, JKL-males: very good 7, JKL-females: very good 6.

This group was also led by the father. The dogs in the group showed great type and expression consistency to the father, the dogs were predominantly of a very good anatomical structure, with very good type and expression, clear differentiation between the genders, were of standard size and had very good movement. The very good inheritance comes equally balanced from the male and female sides. The future will tell what percentage of the dogs will present themselves in the working dog class.

**4. \*Vegas du Haut Mansard SZ 2164725, SchH3, WT: 16.03.2004**

**HD-Befund (hips): Normal – ED-Befund (elbows): Normal**

*Pakros d' Ulmental, SZ 2138739, SchH3	*Bax von der Luisenstraße	Odin vom Hirschel
		Beaury v. d. Huis Kirura
	*Karma vom Ochsentor	Wasko d' Ulmental
		Feli vom Ochsentor
*Rangoon du Haut Mansard, LOF 527930, Brevet	*Owen du Fosse de Norva	Jango vom Fürstenberg
		Lana du Val D'Anzin
	*Jalna du Haut Mansard	Gold du Bois de la Brasse
		Iseult du Fosse de Norva

**Inbreeding:** NONE

**Sire:** Vegas, son of Pakros d' Ulmental (Breed Champion 2007) goes via Bax von der Luisenstraße (Sieger 2003) on the paternal side via Odin Hirschel (VA 1997/98) and Nero Hirschel (VA 1993/94) to **Zamb von der Wienerau** (Sieger 1992). The father of Zamb is Odin von der Tannenmeise (VA1987/88) who goes back to the Sieger (1986/87) **Quando von Arminius**.

**Dam:** The mother goes via Jango von Fürstenberg (VA1998/99) to Esko vom Dänischen Hof (VA2000/01). The father of Esko is Wobo vom Lärchenhain (SG9 1993 JHKL) who goes via Chicco von der Lohner Heide (no BSZS rating) to **Zamb von der Wienerau** (Breed Champion 1993) to the Sieger 1986/87 **Quando von Arminius**.

Placements of offspring in the top of classes:

GHL-females: 2 x V-A (Excellent select).

The group was led by the father. At the age of more than 9 years, Vegas was in amazingly good condition and was full of vigour. Uniquely, a progeny group of Vegas was presented for the eighth time.

The dogs in the group showed great type and expression consistency to the father, the dogs were predominantly of very good anatomical structure, with very good type and expression, clear differentiation between the genders, were of standard size and had very good movement. As in the past, the firmness of the ankle joint must be assessed in the descendants.

In my opinion, the very good inheritance comes from the female side. As in the past, of particular mention is the percentage of dogs that are in the working dog class.

**The following progeny groups were of good quality:**

**1. \*Iliano vom Fichtenschlag SZ 2241909, SchH3, WT: 03.09.2009**

**HD-Befund (hips): Near Normal – ED-Befund (elbows): Normal**

*Remo vom Fichtenschlag, SZ 2208401, SchH3	*Ray vom Fichtenschlag	Dux de Cuatro Flores
		Carolin vom Fichtenschlag
	*Thora vom Fichtenschlag	Wilko vom Fichtenschlag
		Lufti vom Hühnegrab
*Viana vom Fichtenschlag, SZ 2165409, SchH3	*Nicos vom Leithawald (INT)	Yasko vom Farbenspiel
		Rita vom Leithawald (INT)
	*Zaskia vom Fichtenschlag	Pascha von der Jahnhöhe
		Yonka vom Fichtenschlag

**Inbreeding:** Yasko Farbenspiel (4-3) Hoss Lärchenhain (5-4) Holly Fichtenschlag (5-4)

**Sire:** Via his father Remo vom Fichtenschlag (Breed Champion 2011/12), Iliano goes to Dux Cuarto Flores (VA 2005-2007) and Hill vom Farbenspiel (VA 2002-2004). Hill is a son of Huppy Arlett (VA 1999) that goes via Eros von der Luisenstraße (V3 1994) back to **Cello von der Römerau** (V3 1987).

**Dam:** The mother Viana vom Fichtenschlag (VA 2010), is a granddaughter of Yasko Farbenspiel (Double Champion 2001/2002) whose father Ursus Batu (Sieger 2000) goes via Hobby Gletschertopf (V22 1997) to **Jeck von Noricum** (Sieger 1993). The father of Jeck is Odin Tannenmeise (VA1987/88) who goes back to **Quando von Arminius** (Sieger 1986/87).

TSB Examination result= 5:3

Placements of offspring in the top of classes:

JHKL-males: Very good 1, JKL-females: Very good 3.

The group was led by the father. Of note in this group is that the dogs have great type and expression consistency to the father, have very good pigment, good to very good anatomical structure, as well as having very good movement, and were of standard size. The differentiation between the genders could be clearer and the forehead in the offspring should be more pronounced.

**2. \*Cobra d' Ulmental SZ 2267319, SchH1 IPO3, WT: 31.10.2009**

**HD-Befund (hips): Near Normal – ED-Befund (elbows): Normal**

*Remo vom Fichtenschlag, SZ 2208401, SchH3	*Ray vom Fichtenschlag	Dux de Cuatro Flores
	*Thora vom Fichtenschlag	Carolin vom Fichtenschlag
		Wilko vom Fichtenschlag
		Lufti vom Hühnegrab
*Venus d' Ulmental, LOI 07/79859, IPO1	*Vegas du Haut Mansard	Pakros d' Ulmental
		Rangoon du Haut Mansard
	Jusy d' Ulmental	Hettel della Grande Valle
		Sissi della Real Favorita

**Inbreeding:** Jango Fürstenberg (5-5)

**Sire:** Via his father Remo Fichtenschlag (Breed Champion 2011/12), Cobra d' Ulmental goes via Dux Cuarto Flores (VA 2005-2007) to Hill Farbenspiel (VA 2002-2004). Hill is a son of Huppy Arlett (VA 1999) that goes via Eros von der Luisenstraße (V3 1994) back to **Cello von der Römerau** (V3 1987).

**Dam:** Venus, originating from Italian breeding, goes in the second generation to the two-time Sieger n 2008/09 Vegas du Haut Mansard and via Pakros d' Ulmental (Sieger 2007) to Bax von der Luisenstraße (Sieger 2003). This line continues through Odin Hirschel (VA 1997/98) to Nero Hirschel (VA 1993/94). Nero is a son of **Zamp Wienerau** (Sieger 1993) that leads via Odin Tannenmeise (VA1987/88) to Double Sieger 1986/87 **Quando Arminius**.

TSB Examination result= 3:3

Placements of offspring in the top of classes:  
 JHKL-males: very good 4, JKL-males: very good 5.

The group was led by the father. From his appearance, Cobra is not a typical son of Remo. Of particular mention in this group is the very good movement of the offspring, the standard size, and that Cobra presents himself as an absolutely very good anatomical son in his progeny group. The uniformity of the offspring in type and expression to the father should improve in the future.

**3. \*Atos aus Agrigento SZ 2237607, SchH3, WT: 29.05.2009**

**HD-Befund (hips): Normal – ED-Befund (elbows): Normal**

*Paer vom Hasenborn, SZ 2194208, SchH3 FH1	*Quenn vom Loher Weg	Uran vom Moorbeck
		Elsa vom Kuckucksland
	*Yada vom Mittelwest	Stano vom Hasenborn
		Pia von der Zenteiche
*Danjali vom Holtkämper See, SZ 2184791, SchH2	*Negus vom Holtkämper See	Zamp vom Thermodos
		Raica vom Holtkämper See
	*Zadana vom Holtkämper See	Yak vom Frankengold
		Wari vom Holtkämper See

**Inbreeding:** NONE

**Sire:** Atos, a son of Paer (VA 2010/13) is, via his grandfather Quenn vom Löher Weg (VA 2005/07), in the bloodline of Ursus von Batu (Sieger 2000). Ursus' father Hobby Gletschertopf (V22 1997) goes via **Jeck Noricum** (Sieger 1993) to Odin Tannenmeise (VA1987/88) and further to **Quando von Arminius** (Breed Champion 1986/87).

**Dam:** Atos' mother, Danjali is a granddaughter of Zamp von Thermodos (Breed Champion 2006) that leads via the father of Zamp Quantum von Arminius (VA2003-2006) to Dux Valcuvia (V5 2000), whose father is Max Loggia Mercanti (VA 1996), a son of Visum Arminius (Breed Champion 1995). The father of Visum, **Jeck von Noricum** (Sieger 1993), goes to Odin Tannenmeise (VA1987/88) and further back to **Quando von Arminius** (Sieger 1986/87).

TSB Examination result= 4:2

Placements of offspring in the top of classes:  
 JHKL-males: very good 5, JKL-males: very good 2.

This group was also led by the father. It is unfortunate that Atos, who completed the TSB examination with a result of 4:2, did not reach the prerequisite for a showing in the GHKL. Of particular mention in this group is that the dogs have the very good type and expression of the father, have very good pigment, and good to very good anatomical structure. The differentiation between the genders is equal. With Atos and his offspring, the forward stride/step should be longer, and when breeding Atos the size factor must be considered.

**4. \*Paer vom Hasenborn SZ 2194208, SchH3 FH1, WT: 19.09.2006**

**Ha-Befund (hips): Normal – ED-Befund (elbows): Normal**

*Quenn vom Löher Weg, SZ 2119344, SchH3 IPO3 FH1	*Uran vom Moorbeck	Ursus von Batu
		Vina vom Moorbeck
	*Elsa vom Kuckucksland	Emo von der Wienerau
		Kerrie vom Feuermelder
*Yada vom Mittelwest, SZ 2187964, SchH3	*Stano vom Hasenborn	Baru vom Haus Yü
		Verena vom Hasenborn
	*Pia von der Zenteiche	Rikkor von Bad-Boll
		Jasmin von der Zenteiche

**Inbreeding:** Ursus Batu (3-4) Ulk Arlett (4-4)

**Sire:** The father of Paer, Quenn vom Löher Weg (VA 2005-07), is a grandson of Ursus von Batu (Sieger 2000). Hobby Gletschertopf (V22 1997), the father of Ursus, goes to **Jeck Noricum** (Sieger 1993) whose father Odin Tannenmeise (VA1987/88) goes back to **Quando von Arminius** (Sieger 1986/87).

**Dam:** The mother's side leads via Stano vom Hasenborn (V18 2003) to Baru vom Haus Yü (V35 1998). Natz Steigerhof (VA1995/96), the father of Baru leads via Nutz vom Mönchberg (V56 1992) to *Mark vom Haus Beck* (VA1988/89) and *Fedor von Arminius*-(VA1987).

TSB Examination result= 3:3

Placements of offspring in the top of classes:

GHKL-males: 1 x V-A (Excellent Select), GHKL-females: Excellent 1 and Excellent V 5.

The group was led by the father. Of particular mention is that in this group the dogs have a very good type and expression consistency to the father, very good pigment, good to very good anatomical structure, as well as good to very good movement . The differentiation between the genders is equal. A number of the offspring should be more correct in the under- line. When mating with Paer, the size factor must be considered.

**5. \*Ober von Bad Boll SZ 2169889, SchH3, WT:21.07.2005**

**HD-Befund (hips): Normal – ED-Befund (elbows): Normal**

*Giovanni vom Kapellenberg (INT), SZ 2128303, SchH1 IPO3	*Quantum von Arminius	Dux delle Valcuvia
	*Wanda vom Haus Stoppacher	Only vom Wutachtal
		Salo vom Maifeld
		Onka vom Haus Stoppacher
*Aike zum Gigelsfelsen, SZ 2078498, SchH2	*Kevin vom Murratal	Rikkor von Bad-Boll
	*Toska zum Gigelsfelsen	Jascha vom Holundergarten
		Ursus von Batu
		Xena aus Agrigento

**Inbreeding:** Visum Arminius (5-5)

**Sire:** The grandfather of Ober von Bad-Boll (Sieger 2010) is Quantum von Arminius (VA 2003-2006), whose father Dux Valcuvia (V5 2000) follows this line via Max Loggia Mercanti (VA 1996) further to Visum Arminius (Sieger 1995). Visum's father **Jeck von Noricum** (Breed Champion 1993) goes via Odin Tannenmeise (VA1987/88) back to **Quando von Arminius** (Sieger 1986/87).

**Dam:** The mother of Ober is a granddaughter of Rikkor Bad-Boll (Sieger 1998/99), a daughter of Kevin Murratal VA 2002/03). Kevin goes via the Sieger 1995 Ulk Arlett and the Breed Champion 1988 Eiko vom Kirschtal to the Double Champion 1984/85 **Uran vom Wildsteiger Land**.

Placements of offspring in the top of classes:

GHKL-male: 2 x V-A (Excellent Select), GHKL-female: 1 x V-A (Excellent Select)

The group was led by the father. Of particular mention in this group is that the dogs have a very good type and expression consistency to the father, very good pigment, good to very good anatomical structure, as well as good to very good movement and very good bone strength in the offspring. There is distinct differentiation between the genders. From my point of view, the good heredity comes from the male side. Of particular mention is the percentage of dogs shown in the working dog class.

**6. \*Mentos vom Osterberger-Land SZ 2220389, SchH3, WT:30.04.2008**

**HD-Befund (hips): Near Normal – ED-Befund (elbows): Normal**

*Nando vom Gollerweiher, SZ 2123269, SchH3 IPO3 FH2	*Yello vom St.-Michaels-Berg	Enzo vom Buchhorn
		Pia vom St.-Michaels-Berg
	*Zindy vom Bierstadter Hof	Kevin vom Murratal
		Anika vom Bierstadter Hof
*Quencie vom Osterberger-Land, SZ 2159838, SchH1	*Nicos vom Leithawald (INT)	Yasko vom Farbenspiel
		Rita vom Leithawald (INT)
	*Uschka vom Osterberger-Land	Esko vom Dänischen Hof
		Clea vom Osterberger-Land

**Inbreeding:** Eros Luisenstraße (4-5)

**Sire:** The father of Mentos, Nando vom Gollerweiher (VA 2007/08) goes to Enzo vom Buchhorn (VA 1998-2000), a son of Lasso vom Neuen Berg (Sieger 1997). Lasso is a grandson of **Mark vom Haus Beck** (VA 1988/89) who goes back to **Fedor von Arminius** (VA 1987).

**Dam:** The mother, Quencie vom Osterberger Land (SG 61 2006 JHKL), is a granddaughter of Yasko Farbenspiel (Double Sieger 2001/2002), whose father Ursus Batu (Sieger 2000) goes via Hobby Gletschertopf (V22 1997) to **Jeck von Noricum** (Sieger 1993). The father of Jeck is Odin Tannenmeise (VA1987/88), who goes back to **Quando von Arminius** (Sieger 1986/87).

TSB Examination result= 5:5

The group was led by the father. Of particular mention in this group is that the dogs have a very good type and expression consistency to the father, very good pigment, good to very good anatomical structure, as well as good to very good movement, and are of standard size. The differentiation between the genders is equal. A number of the offspring should be more

correct in body structure; should result in firmer back ligaments. The good heredity comes equally balanced from the male and female side.

7. \*Enosch v. Amasis SZ 2258762, SchH3, WT:05.02.2009

HD-Befund (hips): Normal – ED-Befund (elbows): Normal

*Ober von Bad-Boll, SZ 2169889, SchH3	*Giovanni von Kapellenberg (INT)	Quantum von Arminius
		Wanda vom Haus Stoppacher (INT)
	*Aike zum Gigelsfelsen	Kevin vom Murrthal
		Toska zum Gigelsfelsen
*Bali v. Amasis, SHSB 646407, SchH1	*Figo van der Lust	Ghandi von Arlett
		Cleo van der Lust
	*Bania del Seprio	Valium von Arminius
		Filly del Seprio

**Inbreeding:** Rikkor Bad-Boll (4-4) Ursus Batu (4-4,5)

**Sire:** Enosch is a son of Ober von Bad-Boll (Sieger 2010) who goes via Giovanni vom Kapellenberg (SG5 2004 JKL) back to Quantum von Arminius (VA2003-2006), whose father Dux Valcuvia (V5 2000) follows this line via Max Loggia Mercanti (VA 1996) further to Visum Arminius (Breed Champion 1995). Visum's father **Jeck von Noricum** (Sieger 1993) goes via Odin Tannenmeise (VA1987/88) back to **Quando von Arminius** (Breed Champion 1986/87).

**Dam:** The grandfather of mother Bali von Amasis, Ghandi von Arlett (VA 2002/2004), goes via Ursus von Batu (Breed Champion 2000) and Hobby Gletschertopf (V22 1997) to **Jeck Noricum** (Breed Champion 1993). The father of Jeck is Odin Tannenmeise (VA1987/88) who goes back to **Quando von Arminius** (Sieger 1986/87).

TSB Examination result= 5:5

Placements of offspring in the top of classes:

GHKL- Males Very Good 8, JHKL-Females: Very good 7 and very good 9, JKL-Females: Very good 7.

The group was led by the father. Of particular mention in this group is that the dogs have a very good type and expression consistency to the father, very good pigment, good to very

good movement, and very good bone strength in the offspring. There is distinct differentiation between the genders. The good heredity comes equally balanced from the male and female side.

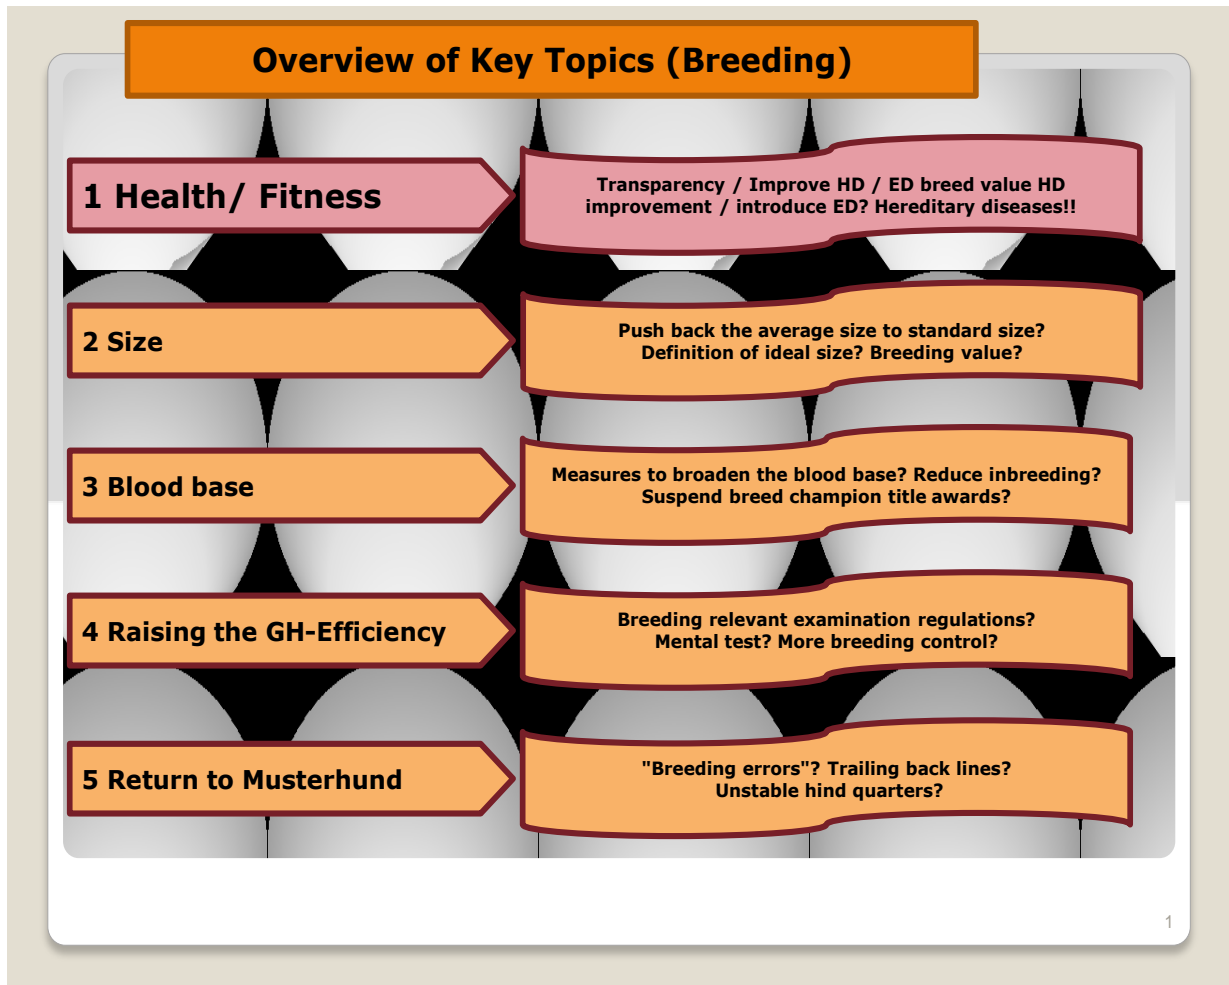

At a meeting in 2013, The Board of Directors of SV decided there would not be a Champion in the Working Dog Classes and, for this reason, also no ranking in the Excellent Select groups. This decision and similar course of action occurred once before in the years 1938 to 1954 and 1974 to 1977.

The fact is, the judging of a dog's anatomy by one person is always a subjective evaluation because the results are not measurable, as they are specified in many other sports.

At the Association's meeting in May 2013, Mr. Lothar Quoll was elected as the new National Breed Warden (Bundeszuchtwart). The BSZS exhibitors have a lot of faith in the new National Breed Warden; going forward there are great expectations for change in the German Shepherd Club.

During the tenure of the former National Breed Warden, I could not comprehend the assessment of some males as 'V-A/Excellent Select' – one reason was, for example, the size. The announcement of the former National Breed Warden, that the broadening of the blood base in the breed would be achieved through the 'Excellent Select' males, has not yet occurred.

At the BSZS dinner party, the new National Breed Warden introduced five key topics of breeding strategy. It is hoped that these key topics will receive broad acceptance at next year's Membership Meeting in Germany.

Another problem is the dying of the dog's coat at breed events.

### **Working Dog Class Males:**

The following Placing were awarded in this class:

14 x V-A (Excellent Select) and 124 x Excellent

The following dogs shown are of excellent anatomical structure:

**1. \*Ballack von der Bruckneralle SZ 2266879, IPO 3, WT: 03.03.2011**

**HD-Befund (hips): Near Normal – ED-Befund (elbows): Normal**

**Father: \*Hagadahls Figo Mother: \*Clea vom Königsadler**

TSB Examination result= 5:5

Ballack is a big, powerful, dry and solid male, with very good type and expression, very good pigment, very strong head, and an absolutely excellent overall anatomical structure. In every phase of the gaiting on and off-leash, Ballack showed very dynamic, extensive, powerful gait with a clear forward step/stride. A very impressive presentation. It is hoped that Ballack will impact the breed in a positive way.

**2. Omen vom Radhaus SZ 2267318, SchH3, WT: 27.08.2009**

**HD-Befund (hips): Normal – ED-Befund (elbows): Normal**

**Father: \*Remo vom Fichterschlag Mother: \*Oprah von Aurelius**

TSB Examination result= 4:5

Omen is an above mid-size, medium strong, dry, solid male, with very good type and expression, very good pigment, strong head, and an absolutely excellent overall anatomical structure. In every phase of the movement test, on and off-leash, Omen showed very dynamic, extensive, powerful gait with a clear forward step/stride. A very impressive presentation.

With the presentation of his offspring, Omen has impressively proven his heredity.

**3. Fulz di Zenevredo SZ 2250707, SchH3, WT:21.10.2008**

**HD-Befund (hips): Normal – ED-Befund (elbows): Normal**

**Father: \*Furbo degli Achei Mother: \*Jemy di Zenevredo**

TSB Examination result= 4:4

Fulz is a large, strong, dry, solid male, with very good type and expression, very good pigment, a very strong head, and an absolutely excellent overall anatomical structure. In every phase of the movement test, on and off-leash, Fulz showed extensive, powerful gait with a clear forward step/stride. An impressive presentation.

With the presentation of his offspring, Fulz has impressively proven his heredity.

**4. Yoker vom Pendler SZ 2266144, IPO 1, WT: 14.04.2011**

**HD-Befund (hips): Normal – ED-Befund (elbows): Normal**

**Father: \*Lennox von Regina Pacis – Mother: \*Corsika vom Pendler**

TSB Examination result= 3:4

Yoker is a large, strong, dry, solid male, with very good type and expression, very good pigment, a very good head, and a very good overall anatomical structure. In every phase of the movement test, on and off-leash, Yoker showed extensive, powerful gait with a clear forward step/stride. A very good presentation.

Yoker's lower chest should be somewhat longer.

### **Working Dog Class Females:**

The officiating judge, Mr. Rüdiger Mai, awarded the following placings in this class:

14 x V-A (Excellent Select), 116 x Excellent, and 4 x Very Good

The V-A (Excellent Select) females were of very high anatomical quality and gave a very impressive presentation in the movement test on and off-leash. Special stand-outs in the female movement test were the following dogs:

**1. Faya vom Adelschlag SZ 2255300, IPO 3, WT: 08.03.2010**

**2. Rustol's Xhena Xellent NKK 30347/12, IPO 2, WT: 03.06.2011**

3. **Queen vom Kapellenberg SZ 2227233, IPO 3, WT: 15.08.2008**

**Young Dog Class Males:**

The officiating judge, Mr. Thomas Teubert, awarded the following evaluations in this class:

96 x Very Good

With my anatomical knowledge and my perception of the dogs presented in the ring on Sunday, I could not understand the majority of the rankings of “best male dogs” in the ring.

The following dog is of excellent anatomical structure:

1. **Kimbo v. d. Tempelhoefe NHSB 2867953, WT: 13.01.2012**

**Father: \*Cobra d' Ulmental – Mother \*Bixie v. d. Tempelhoefe**

Kimbo is a large, medium strong, dry and solid male, with very good type and expression, very good pigment, a strong head, and an absolutely excellent overall anatomical structure. In every phase of the movement test, Kimbo showed dynamic, extensive, powerful gait with a clear forward step/stride. A very impressive presentation.

### **Young Dog Class Females:**

The officiating judge, Mr. Dieter Nitschke, awarded the following evaluations in this class:

130 x Very Good and 4 x Good

Since I took part as an exhibitor with my own dog (SG 4 Wiki dei Precision) in the JHKL-Female dog class, I will not offer any comments on individual females. The anatomical quality of the females in the ring on Sunday was of a very high level.

### **Youth Class Males:**

The officiating judge, Mr. Frank Goldlust, awarded the following evaluations in this class:

124 x Very Good

The following dogs shown are of an excellent anatomical structure:

#### **1. Arre vom Hühnegrab SZ 2280805, WT: 04.05.2012**

**Father: \*Lennox von Regina Pacis – Mother: \*Jalmari vom Hühnegrab**

Arre is a large, strong, dry and solid male, with very good type and expression, very good pigment, a very strong head, and an absolutely excellent overall anatomical structure. In every phase of the movement test, Arre showed very dynamic, extensive, powerful gait with a clear forward step/stride. A very impressive presentation.

It is hoped that Arre develops full firmness of the ankle joint during the coming year.

#### **2. Quoran d' Ulmental ROI 12/64314, WT: 05.03.2012**

**(no picture)**

**Father: \*Baru Croce Santo Spiroto – Mother \*Clea d' Ulmental**

Quoran is an above mid-size, medium strong, dry and solid male, with very good type and expression, very good pigment, strong head, and an absolutely excellent overall anatomical structure. In every phase of the movement test Quoran showed very dynamic, extensive, powerful gait with a clear forward step/stride. An impressive presentation.

Quoran should show a bit more alertness in some phases of the movement test.

**Youth Class Females:**

The officiating judge, Mr. Rainer Mast, awarded the following evaluations in this class:

183 x Very Good

Also in this class, with my anatomical knowledge and my perception of the dogs presented in the ring on Sunday, I could not understand the majority of the rankings of “best female dogs” in the ring. Above all, it is not understood how some of the anatomically very good females were ranked from 20<sup>th</sup> place and up.

Philip Eramo
